#### Notice

Medicine is an ever-changing science. As new research and clinical experience broaden our knowledge, changes in treatment and drug therapy are required. The authors and the publisher of this work have checked with sources believed to be reliable in their efforts to provide information that is complete and generally in accord with the standards accepted at the time of publication. However, in view of the possibility of human error or changes in medical sciences, neither the authors nor the publisher nor any other party who has been involved in the preparation or publication of this work warrants that the information contained herein is in every respect accurate or complete, and they disclaim all responsibility for any errors or omissions or for the results obtained from use of the information contained in this work. Readers are encouraged to confirm the information contained herein with other sources. For example and in particular, readers are advised to check the product information sheet included in the package of each drug they plan to administer to be certain that the information contained in this work is accurate and that changes have not been made in the recommended dose or in the contraindications for administration. This recommendation is of particular importance in connection with new or infrequently used drugs.

# PREFACE

With *First Aid Cases for the USMLE Step 1*, 3rd edition, we continue our commitment to providing students with the most useful and up-to-date preparation guides for the USMLE Step 1. This edition represents an outstanding effort by a talented group of authors and includes the following:

- An all-new, two-color tabular design for efficient and effective study.
- Updated USMLE-style cases with expanded differentials and commonly asked question stems seen on the USMLE Step 1.
- Concise yet complete with relevant pathophysiology explanations.
- New high-yield figures and tables complement the questions and answers.
- Organized as a perfect supplement to *First Aid for the USMLE Step 1*.

We invite you to share your thoughts and ideas to help us improve *First Aid Cases for the USMLE Step 1*. See "How to Contribute," on p. xxiii.

# ACKNOWLEDGMENTS

We gratefully acknowledge the thoughtful comments, corrections, and advice of the many medical students, international medical graduates, and faculty who have supported the authors in the development of *First Aid® Cases for the USMLE Step 1*, 3rd edition.

For support and encouragement throughout the process, we are grateful to Thao Pham, Selina Franklin, and Louise Petersen.

Thanks to our publisher, McGraw-Hill, for the valuable assistance of their staff. For enthusiasm, support, and commitment to this challenging project, thanks to our editor, Catherine A. Johnson. For outstanding editorial work, we thank Emma D. Underdown, Isabel Nogueira, and Carol Ayres. A special thanks to Rainbow Graphics for remarkable production work.
