---

*I dedicate this book to my wonderful wife, Rosemary.*

*I'm not sure I understand how or why you put up with me, and the writing of yet another book. Words cannot express my appreciation. I love you a lot!*

—STEVE

*I would like to dedicate this book to my beautiful wife, Jill. Just today she reminded me that after the last book I told her to never let me write another book, and here we are. I would not have been able to hold it together long enough to finish this book without her support. Thanks, babe, I love you.*

—TODD

*This book is dedicated to Baby Luke. Howdy. Funny enough, you are nine months old as I write these words. I have doubts that by the time you are old enough to read this book that paper books will even exist anymore. Either way, take a look at this old relic and smile and know all things are possible with your friend hard work. Dad got a D- in English and yet this is book number six for him. You and your brother better get better grades than me. Your mother and I love you.*

—SHANE

---

## ABOUT THE AUTHORS

**STEVE CARAVAJAL** is director of productivity solutions and lead architect with the Microsoft Corporation. Steve has 25+ years' experience in technology leadership, strategy, product development, consulting, and training. Dr. Caravajal works with large enterprise companies, and his focus includes architecting solutions that include SharePoint, enterprise social computing, business intelligence, search, and cloud-based applications. He also advises several local companies on Enterprise strategy.

Steve holds a bachelor of science degree in chemistry and mathematics, and a doctoral degree in chemistry and computer science. He is an adjunct professor at a couple of local universities in the Cincinnati area, teaching Enterprise Architecture, public and private cloud technology, and software development. In addition to holding several patents and speaking at conferences, Steve has written four books: *SharePoint 2007 and Office Development Expert Solutions*, *Inside SharePoint 2007 Administration*, *Professional SharePoint 2010 Administration*, and *Professional SharePoint 2013 Administration*.

**TODD KLINDT** has been a professional computer nerd for nearly 20 years, specializing in SharePoint for the last 10 years. His love affair with SharePoint began one slow day at the office when he discovered SharePoint Team Services 1.0 on the Office XP CD that was holding up his coffee cup, and he decided to take it for a spin. The rest is history. Since then, he has had the pleasure of working with SharePoint farms both large and small. In 2006 he was honored to be awarded the MVP award from Microsoft for

Windows SharePoint Services, and he has written several books and magazine articles on SharePoint. Todd has presented sessions on SharePoint at many major conferences both in the United States as well as Europe and Asia, and does the user group circuit, SharePoint Saturday events, and the occasional children's birthday party as well. He chronicles his SharePoint adventures on his blog, [www.toddklindt.com/blog](http://www.toddklindt.com/blog). Because his chosen career as a Hollywood stuntman didn't pan out, he is currently working his dream job as a SharePoint consultant at Rackspace, where he spends his days fixing broken SharePoint environments and bringing new SharePoint environments into the world, along with the occasional nap at his desk. If you're bored, you can follow him on Twitter @toddklindt.

**SHANE YOUNG** is just your average SharePoint nerd who has been doing nothing but SharePoint for a long time now. Microsoft has been kind enough to award him MVP status for eight years running now, so you know he is the outspoken type. Thankfully, his newest employer, Rackspace, appreciates that about him. If you are wondering what happened to SharePoint911, don't worry; the band is still together, we are just flying the Rackspace flag these days, bringing fanatical SharePoint to

the open cloud. You can contact Shane on Facebook, LinkedIn, Twitter (@ShanesCows), via e-mail ([shane.young@rackspace.com](mailto:shane.young@rackspace.com)), his blog (<http://msmvps.com/shane>), or through his company's website ([www.SharePoint911.com](http://www.SharePoint911.com) or [SharePoint.Rackspace.com](http://SharePoint.Rackspace.com)). Shane lives in Cincinnati, Ohio, with his wife, Nicola, his two sons, Grant and Luke, and their two dogs.

---

# ABOUT THE TECHNICAL EDITORS

**BRIAN CAAUWE** is a SharePoint 2010 MCM and has been working with the SharePoint platform since 2007. He typically walks the tightrope between administration and development as a senior SharePoint consultant, with a focus on systems architecture, security, migrations, and integration strategies with Avtex Solutions.

Brian came to the SharePoint world from a network administration background working with Active Directory, SQL Server, Exchange, Citrix, and many other proprietary applications. Armed with this administration baseline, and a pre-existing passion for web development, his skills were a perfect match for SharePoint.

**SEB MATTHEWS** is a Microsoft architect with over 20 years' experience working with mid-tier and enterprise organizations. He is currently providing consultancy services to businesses that want to utilize Microsoft technologies in big-data, cloud, and business-critical scenarios, architecting information repositories, portals, and business process management platforms.

A frequent speaker at conferences and community events, Matthews is also an active member of the SharePoint community in Europe, Africa, and the U.S.A. When he isn't SharePointing, he enjoys the outdoors, being a geek, and spending time with his wife, young son, and Barney the dog.

**STEPHEN WILSON** has worked as a technical resource in a number of industries such as retail, financial, and higher education. Over the last six years he has been devoted to training and consulting on SharePoint and related technologies. He has extensive experience with presenting, developing documentation, and training programs. As a consultant, his focus has been on installation and infrastructure. Recently, Stephen has become more involved with presenting at SharePoint events.

# ACKNOWLEDGMENTS

**THANKS, NICOLA!** Yes, once again you are up for the wife of the year award for putting up with another book writing — and this time we have two kids. How crazy is that? Grant and Luke are lucky to have you for a mommy! I would feel bad to again forget mentioning the other two boys, so just in case Tyson or Pugsley learn how to read: Hello, doggies.

To my fellow authors: Good job, guys. We once again managed to get a masterpiece out the door without killing each other. That is some kind of miracle. I am certain one of you will want to write another book sooner or later, so I will go ahead and start getting an outline together. *Ugh.*

Hey, all of you contributors: Good work! I know it is annoying trying to work with us but hopefully the result is worth it. I know that Todd, Steve, and I really appreciate it and the book wouldn't be nearly as good without you guys. One person I want to call out specifically is Stephen Wilson, who carried multiple torches with his content creation and tech editing. Thanks, Stephen. You are a heck of a guy; I don't care what Todd says. The key point here is Rackers rule!

Wiley folks! Thank you. I know we are a pain in the butt to work with but the end product looks great. Ami and Mary, I feel the worst for you two because you have to battle us and then work with us at the same time. Sorry. And Jim? Yeah. Not sure how many grey hairs you have with our names on them but I am certain they are many. Thanks for continuing to love us.

I love you, little Sparky!

—SHANE

**WELL, THIS BRINGS US** to the close of another SharePoint book. I guess I should thank my partners, Shane and Todd, but since they didn't do any of the writing — oops sorry, one chapter each — thanks guys, you are a big help! One of the best experiences in the world is writing a book, but unfortunately one of the worst experiences is writing a book. So, I should definitely thank our Wiley task masters, Mary and Ami, who worked to keep us in line and productive. If you've ever tried to herd cats, you'll know what their experience was like, so thank you very much; we couldn't have done it without you. As always, the technical editors and the contributing authors played a very big role, so thank you very much for all your help! And last, but definitely not least, I want to thank my beautiful and wonderful wife, Rosemary. I know that I tell you I'm not going to do this again, and yet I continue to do it again. Thank you so much for your support and patience.

—STEVE

---

**MY PORTION OF THIS** book would not have been possible without the support of my lovely wife, Jill. Thanks again. You endured another year of me writing a book, and even worse, a year of me whining about writing a book. You kept the kids clothed and fed, and the house running. I appreciate it. You're my rock.

I am contractually required to thank my coauthors. Thanks, Shane and Steve, for putting up with me for another book. Once again, we all vowed to never do this again, and once again the lure of fame and fortune ruled out over common sense. Now it's time for the supporting tour and movie deals. I hope you're both ready. I know I am.

This book would not be as awesome as it is without the help of some very dedicated contributing authors. They did a great job writing chapters and keeping us on our toes. Thanks, guys.

Finally, this book would have stalled multiple times if it weren't for the tenacity and nagging of Wiley folks. Many times they had to bring us kicking and screaming back on task. A special shout out to Ami and Mary, who put up with a lot of missed deadlines. Sorry about that. It's all in now, though.

—TODD
